

# Using Portfolios on Class Dojo

## ClassDojo

Portfolios are a great way for parents and children to show off their work and share it with their teachers.

### Step 1

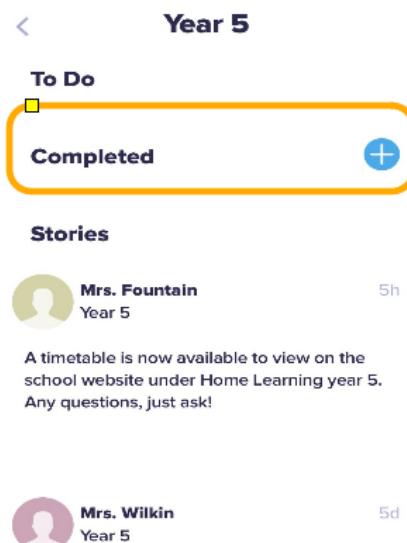

This is what your child's personal Dojo page will look like.

As you can see, at the moment, there are 'No activities' set.

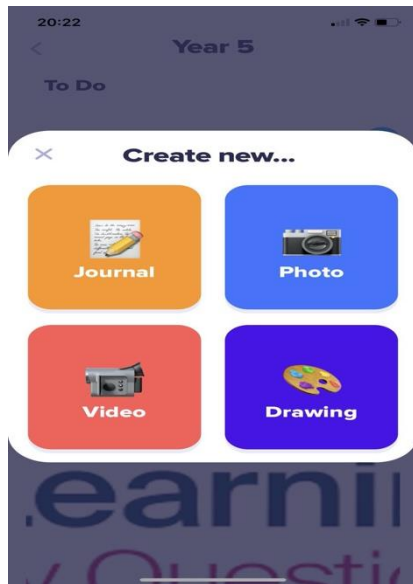

If we tap it, it takes us to the next page anyway, giving us the opportunity to upload to your child's portfolio.

### Step 2

We then would click on the + symbol next to the Completed section

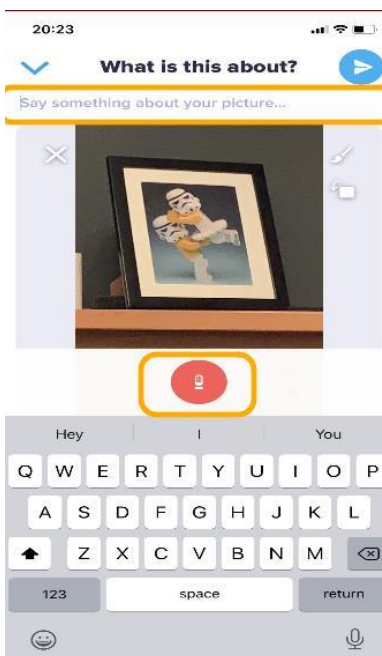

## Step 3

This then gives you the option of what sort of entry might go into the portfolio,

This might simply be a photo or video of something and show your teacher!

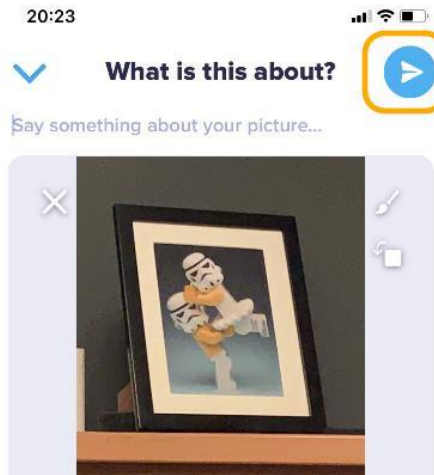

## Step 4

Now you have taken your photo, you need to explain what it is about.

You can either type something in the top box, or another idea is to hold the record button (if you have a microphone) and explain in your own words what your image is of.

## Step 5

When you have explained what your image is about, you click the send button to send it to your child's portfolio.

The class teacher gets a notification and will comment on the work.
