

Parent guide for using j2e

In the event of a school closure work will be set for children to complete on j2e. The children should be familiar with how to login to this from their work in Computing lessons.

Go to www.j2e.com

You must sign in to see this page.

Jit5

jit5 is designed for the youngest learners, providing 8 integrated tools that work across platforms. Learners can write, paint, create turtle programs, charts and pictograms, branching databases and animations and then mix them all together into a personal **mix**. Learners can also record audio to accompany their work.

All the work is saved into learners' J2e **my files** area and can be seen by staff, who can also use the **learning conversation**, which encourages learners to self-reflect and enables teachers to give instant feedback either by text or voice on a piece of work or a whole folder.
